

DIGITAL FORK LEVEL INDICATORS

Improve Safety | Reduce Damages | Increase Productivity

IMPROVES SAFETY, when moving loads. Even the best forklift drivers have problems judging the tilt of their forks when entering or exiting pallets. The risk of pallets mistakenly being pushed or pulled of a rack is significant. Take control of these problems, by making a fork level indicator part of your driver safety equipment.

REDUCE DAMAGES, To products, Pallets and Racks. The main cause of product, rack and equipment damage is forks tilted at the wrong angle. If the forks are not level, drivers can spear product from inside or above the pallet opening, bend or push over racking and splinter pallets. The flat fork will quickly pay for itself through less damages.

INCREASES PRODUCTIVITY, Work is easier and faster. Drivers rarely admit it but they spend a lot of time through trial and error trying to pull and place pallets when working with elevated loads. Flatfork makes that work go quickly, and will also show the driver the correct fork angle when traveling with a load or when parking.

Counterbalance Forklift Truck (Mast tilt)

- Single box with built in Red, Amber & Green LED indication mounted at eye level in front of the operator
- Designed to attach to right side of mast
- Can be mounted on either side of the mast

“THE NEW SAFETY STANDARD”

Reach Lift Forklift Truck (Fork Carriage Tilt)

- Uses two paired boxes and RFID Technology. One box attaches to fork carriage to measure the tilt of the forks, and it sends a signal to a second display box with built in Red, Amber & Green LED indication mounted at eye level in front of the operator.
- Can be mounted on either side of the mask
- Also, works well on construction boom trucks.

Features	Benefits
Under 1 minute to install	Get started quickly, no tools, wires or service technician needed
Accurate within 0.25 of a degree	Consistently shows whether or not a load is true horizontal
IP67 Rated. CE Mark Approved	Exceptional protection against dust and water
Rugged ABS Box, tightly sealed	Rust proof and durable. Works outside in wet weather
Uses two standard "D" size batteries	One year average battery life or approx. 1,600 operating hours
Adapts to bent or uneven forks	Balances loads despite damaged equipment
Works with a variety of forklift attachments	Effective with attachments, such as Clamps, Extended or Carpet forks
Useful on uneven forks	Securely attached to hold level position and not slip on the mask
Attached with powerful rare earth magnets	Portable, can be moved to other lift trucks as required
Not permanently fixed to mask	Use on the side that works best for the driver
Clear LED Display	Red / Yellow / Green LED lights for fast recognition
Turns ON/OFF automatically motion activated	No ON/OFF switch, preserves battery power
Engineered and made in the USA	High standards, proven quality you can trust
2-year product guarantee	Risk free, invest with confidence
Top quality electronics in a sealed system	Zero maintenance required
Improves safety standard for lift trucks	Valuable for insurance and reducing damaged goods
Patent Pending, Innovative technology	ISO 9000/9001, shows auditor how you are improving safety and productivity

Specifications.

Dimensions 1600mm High x 600mm Wide x 650mm Deep including Magnets
Weight 664 grams with batteries

Compuload is the trusted name in On Board Weighing. Established in 1988 we are privately owned Australian company who design, manufacture and distribute the quality Compuload On Board Weighing products and accessories through Australia and Export markets. Our aim is to offer quality products, dependable performance, reliable delivery and technical backup for all your weighing requirements.
