Compuload Load Indicator Crane Scale

The Compuload CLY-AL series of digital Load Indicator Crane Scale, offers the user a simple and easy method to weigh goods in a lifting / tension application, up to 5000kg capacities.

Standard 6 digit 18 mm LCD backlight display makes for easy reading of the displayed weight. 24 hours of continuous operation with-out backlighting. Standard Zero, Tare function, Stable function makes this a very simple to use scale. The CLY-AL Load Indicator Crane Scale from Compuload is also able to read weights in kg, KN & Klb.

Displays the gross and net weight. Other handy features include an overload alarm to warn you if have gone over the capacity of the Load Indicator Crane Scale plus a battery indication function to warn you of the current battery power level. The applications are limitless from Food industry, Fishing and Marine Industry, General Industry, Measuring Tension Forces and General Tension weighing. (Non trade weighing applications only)
Shackles not supplied.

Caution: Overloading of Compuload Load Indicator Crane scale will void all warranty claims and can result in serious injury or death.
